- **PostgreSQL** database
- App deployed on **Heroku**, and back-end managed with **ExpressJS** server

## SUMMARY

Self-taught frontend engineer, I am currently employed as an IT engineer at E-Growth.

In the past year, I have developed my skills in front-end development, developing projects using the latest JavaScript frameworks VueJS and ReactJS, with their fullstack equivalent NuxtJS and NextJS.

I am flexible enough to constantly learn and adapt to different environments and have a proactive attitude towards new technologies and challenges. I would like to work in an environment where I can utilise these skills and further grow and contribute to some exciting projects.

## LANGUAGES

English
